Allowable Subject Matter

1. Claims 1-51 is allowed over the prior art of record.

Reason for Allowance

2. The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach or fairly suggest the combination of elements as recited in the independent claim. Specifically prior art does not teach:

"building a splat hierarchy from hierarchical node data with converting the hierarchical node data into mesh content, wherein building the splat comprises:

determining a plurality of leaf node splats each corresponding to one of the plurality of leaf nodes that includes a portion of an isosurface, each of the plurality of leaf node splats based on scalar data corresponding to at least one of the plurality of leaf nodes

determining a plurality of non-leaf node splats each corresponding to one of the plurality of non-leaf nodes that includes a portion of the isosurface, each of the plurality of non-leaf node splats based on a plurality of splats each corresponding to a lower hierarchical node; and

rendering a plurality of splats partially populating the splat hierarchy resulting from the determination of the pluralities of leaf node splats and non-leaf node splats.

The dependent claims being definite, further limiting and fully enabled by the specification are also allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee, to avoid processing delays, should preferably accompany the issue fee. Such submission should be clearly labeled "Comments on Statement of Reasons for Allowance."
